CERTAINTY H400 SERIES
ENTERPRISE COMMERCIAL SERVER

The Seneca Experience puts the integrator first through innovation. We use decades of experience to accommodate our partners from planning and deployment to monitoring and post-sale support.

The Seneca Certainty H400 Series Server is purpose-built with one thing in mind: high-throughput compute designed to interface with SAN-based storage. Designed for optimal compatibility with the Seneca xVault SAN storage solution, the H400 product is built for both scale and performance. From transportation to government facilities – and any venue in between – the Seneca Certainty H400 Series plus xVault storage is the solution of choice.

KEY FEATURES
- Comes standard with xConnect and Maestro technology
- Five-year global next-day, on-site service warranty
- Up to 8 high-speed SAS drives
- Optimized for use with Seneca xVault SAN Storage

THE SENECA DIFFERENCE

xCONNECT
Remote Management Platform

Seneca's exclusive xConnect platform puts you in complete control of your security hardware with an easy-to-use dashboard that allows you to audit, manage and act remotely. Instant alerts report problems before customers do, making you more proactive. Off-site control means less truck rolls and more profitability.

maestro
Optimization realized

Also standard with all Seneca Servers, Maestro gets your optimized system up and running in minutes instead of hours. We channeled years of value engineering into an intuitive dashboard that eliminates hundreds of keystrokes. You don't even need an internet connection or data transfer from external drives.
