

Fixed Dome Network Camera **FD8371EV**

As a professional day/night camera, FD8371EV features a Smart IR technology which provides the excellent ability of anti-overexposure and noise reduction to adjust the IR lighting intensity instantly based on environmental lighting change.

Featuring 3D Noise Reduction Technology, it enables the FD8371EV to capture clear, polished video under low-light conditions, which also helps to reduce bandwidth from sensor noise. By combining with WDR Enhanced technology, users can identify image details in extremely bright as well as dark environments.

The FD8371EV also features Smart Stream Technology, which can be used to optimize resolution on a desired object or area to maximize bandwidth usage.

The FD8371EV comes with a P-iris lens, which controls the iris with extreme precision with its built-in stepper motor. By using software controls, the lens maintains the iris opening at an optimal level at all times, resulting in superior sharpness and depth of field as well as image quality. For installers, properly adjusting the focus of a megapixel network camera can be difficult due to the image detail. Thus, VIVOTEK has introduced the Smart Focus System to make installation and adjustment easier by allowing for remote focus and zoom adjustment.

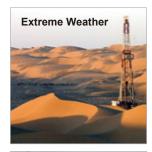

The IP66-rated housing is designed to help the camera body withstand rain and dust and high pressure water jets from any direction while IK10-rated housing provide the protection against the vandal act and impact. Additionally, the wide temperature range further enhances the FD8371EV's performance and reliability in extremely cold and warm weather.
