

## Guide of using ToWMV.exe to convert .mp4 file to AVI file

1. Before running ToWMV.exe, you must install the following software in your computer:
  - DirectX (9.0)
  - WM Encoder9
  - WM Format SDK (9.0)
  - Ffdshow
  - Windows Media Player Filter 4.6
2. Double click ToWMV.exe to run this program, see below diagram:

- 2.1 Click button "Browse" to select source file that need to be converted.
- 2.2 Click button "Save as" to select saving path of convert file and input target file name.
- 2.3 Click button "Video" to confirm the video setting (Needed), Click button "Audio" to confirm the audio setting.
- 2.4 Click "Start" to begin convert.

### Note:

- A: Don't do 2 or more convert works at same time because of high CPU usage while convert AVI file.**
- B: Some special original files will fail to convert, these files include audio file, changing resolution file, the file with different head between file and block.**
